Hamza Mlaouhi

Senior Mobile Engineer

Tunis, Tunisie · hamza0mlaouhi@gmail.com · +216 24 878 978 · LinkedIn

Professional Summary

Senior Mobile Engineer with 5+ years of experience building scalable, high-performance mobile applications for Android and iOS. Expert in cross-platform development with Flutter and native development using Kotlin/Java and Swift. Proven ability to design robust mobile architectures, integrate APIs, and deliver production-ready applications from concept to App Store and Google Play deployment. Strong experience with CI/CD automation, modern development workflows, and AI-powered engineering tools to accelerate development and improve code quality.

Technical Skills

Mobile: Flutter (Dart), Android (Kotlin, Java), iOS (Swift), React Native, MAUI

Architecture & Patterns: Clean Architecture, BLoC, Provider, MVVM, Repository Pattern

Backend & APIs: REST API, GraphQL, Firebase, Laravel (PHP), Spring Boot (Java)

DevOps & Tools: CI/CD, GitHub Actions, GitLab CI, Fastlane, Docker

Testing: Flutter Test, Mockito, Widget Testing, Unit Testing

Collaboration: Git, Jira, Asana, Trello, Slack, Teams, Figma, Postman, Swagger

Experience

MawadOnline, Senior Mobile Engineer

September 2024 – Present Tunis, Tunisia

- Built a real-time in-app chat system using Firebase, improving user engagement metrics by an estimated 25%.
- Integrated multiple payment gateways (including secure transaction flows) to support seamless e-commerce transactions.
- Reduced app bundle size by ~20% through code deduplication and applying DRY principles across the codebase.
- Implemented offline-first architecture using SQLite and connectivity_plus, ensuring full functionality without network access.
- Delivered multilingual support (i18n) and push notifications via Firebase Cloud Messaging (FCM), expanding user reach.
- Integrated Firebase Crashlytics to monitor app stability in real time, enabling rapid identification and resolution of crashes across iOS and Android.
- Implemented automated deployment pipelines using Fastlane, enabling one-command releases and eliminating manual App Store and Play Store submission steps.
- Managed end-to-end deployment and versioning for both iOS (App Store) and Android (Play Store) releases.
- Configured App Store Optimization (ASO) strategies keywords, metadata and visuals to improve app discoverability.
- **Tech Stack:** Flutter, Firebase, REST API, CI/CD, GitHub, Zoho Sprint

Sofiatech, Senior Mobile Engineer

February 2024 – August 2024 Tunis, Tunisia

- Architected the Surtech application using Clean Architecture and BLoC pattern, ensuring clear separation of UI, domain, and data layers.
- Developed responsive UI components following Material Design standards, improving usability across device sizes.
- Integrated REST APIs for multi-device data synchronization with robust error-handling and retry mechanisms.

- Leveraged Microsoft Clarity to track user behavior, heatmaps, and session recordings, providing actionable insights to improve UX and identify friction points.
- Implemented real-time device sync and notifications to maintain consistent application state.
- Utilized AI development tools including GitHub Copilot and Cursor to accelerate feature development, assist with code refactoring, and maintain high code quality standards.
- Wrote unit and widget tests using Flutter's test package and Mockito, achieving reliable test coverage for state management logic.
- Delivered full multilingual support using Flutter's intl package for diverse user bases.
- **Tech Stack:** Flutter, Android, REST API, CI/CD, GitLab, Teams, Dromos

LRT Automotive GmbH, Mid-Senior Mobile Application Developer

November 2023 – February 2024 Tunis, Tunisia

- Integrated GraphQL APIs to connect seamlessly with Wallbox EV charging machines, enabling real-time device control.
- Built a geolocation system for user location detection, improving contextual UX for charging station discovery.
- Developed a dynamic network connectivity detection mechanism to gracefully handle offline/online transitions.
- Optimized resource-intensive processes, reducing latency and improving overall application responsiveness.
- **Tech Stack:** Flutter, IOS, Android ,GraphQL, REST API, CI/CD, GitLab, Jira

Zahou-tech, Mobile Engineer

December 2022 – November 2023 Tunis, Tunisia

- Maintained and optimized 4+ Flutter applications, reducing crash rates by ~30% and improving load times.
- Implemented geolocation features using the geolocator package and Google Maps API for real-time location services.
- Set up CI/CD pipelines via GitHub Actions to automate build, test, and deployment workflows.
- Integrated WordPress REST API and custom RESTful APIs using Dio/HTTP for dynamic content delivery.
- Introduced unit testing across projects, improving code reliability and enabling faster regression detection.
- Collaborated with UI/UX designers to translate Figma designs into pixel-perfect Flutter interfaces.
- **Tech Stack:** Flutter, Android, GitHub Actions, WordPress, CI/CD, Figma

UTEEK, Mobile Developer

January 2022 – November 2022 Tunis, Tunisia

- Developed and published 5+ mobile applications on App Store and Google Play, including **Womentum**, **Jaou Photo App**, and **Kultur Austausch (IFA)**.
- Integrated Firebase Authentication, Firestore, and FCM for real-time notifications, auth, and chat features.
- Implemented Provider for scalable state management across multi-module applications.
- Profiled app performance using Flutter DevTools to identify and resolve memory and rendering bottlenecks.
- Built responsive layouts using MediaQuery and the Sizer package, ensuring consistent UX across all device sizes.
- **Tech Stack:** Flutter, IOS, Xamarin, Laravel, Firebase, GitLab, MySQL, Slack

Freelancer, Mobile Developer

May 2021 – August 2022 Tunis, Tunisia

- Designed and built **Diyafa** (customer + staff apps), OOUC, and Nurtify — all published on Google Play Store.
- Developed and maintained Android (Java) applications for bowling venue clients Limoges Bowling and Planet Bowling, resolving critical performance issues including slow API response times and UI jank under load.
- Successfully led a full migration of the bowling applications from Java to Kotlin, modernizing the codebase with coroutines for async operations and improving data flow architecture using Kotlin Flows.

- Built **Vivencia**, an AI-powered cosmetics application featuring face recognition (TensorFlow Lite) to analyze skin type and recommend personalized products, combined with a full cosmetics marketplace.
- Implemented Clean Architecture with feature-based modules, improving code maintainability and team collaboration.
- Built real-time shopping cart using Firebase Realtime Database with Provider for live state synchronization.
- Applied AI-assisted tools such as GitHub Copilot, ChatGPT, and Tabnine to speed up development workflows and debug complex issues across multiple client projects.
- **Tech Stack:** Flutter, Android, iOS, REST API, Firebase, GitHub, Figma, Jira, Swagger

Education

ISSAT Kasserine, National Degree in Computer Science & Multimedia 2016 – 2019

ESPRIT, Computer Engineering — Specializing in Mobile Development 2019 – 2022
